DETAILED ACTION

Newly submitted claims 47-62 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The composition of these claims, claim thrombin, water soluble organic acid and a surfactant. This is restrictable since the invention in the last office action applicant was claiming thrombin, water soluble organic acid and **calcium ion**. The removal of the calcium ion and the addition of the **surfactant** changes the invention since the product (composition) now has different components making it a different composition.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims ¹⁸⁻²⁰⁸47-62 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1654

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
